

This guide consists of three, 50 question practice tests. The tests are structured to take you through the most common questions you'll find on most professionally administered IQ tests.

The goal of each of the tests is to assess your ability to answer a significant variety of analytical questions in a short amount of time. Through repeated exposure to these common question types, you'll become much more comfortable with IQ tests that assess your verbal comprehension and working memory.

Our recommended process for taking each test is as follows:

1. Print out the pages that you need for the test.
2. Grab a pencil and find a quiet area.
3. Set a timer for the stated number of minutes and start it as soon as you begin reading the first question.
4. Drop your pencil as soon as the timer goes off, and then grade your test.

Although taking the tests in a timed environment is recommended (since it simulates a common testing setup), it's not a requirement. However, the grading scale found at the end of this guide will only be accurate if the test was timed.

Good luck!
